

PMI offers a variety of quality, scientifically substantiated smoke-free products that are much better choices than continued smoking. Our vision is that our smoke-free products will one day replace cigarettes.

GOOD CONVERSION PRACTICES FOR PMI'S SMOKE-FREE PRODUCTS
issued on pmi.com on August 16, 2019

- 1. Cigarette smoking causes serious diseases and is addictive. Without question, the best decision any smoker can make is to quit tobacco and nicotine use altogether.**
- 2. PMI's smoke-free products are for adults who would otherwise continue to smoke or use other nicotine products.**
- 3. We do not offer PMI's smoke-free products to people who have never used tobacco or nicotine products or who have quit using tobacco and nicotine products. Our smoke-free products are not an alternative to quitting and are not designed as cessation aids.**
- 4. PMI's smoke-free products are not risk free and contain nicotine, which is addictive. Switching to a smoke-free product is, however, a much better choice than smoking.**
- 5. We support our adult smoke-free product users in their journey to full conversion through education and guidance.**
- 6. For consumers to experience the benefits of smoke-free products, they must switch completely and abandon smoking permanently.**
- 7. Minors should not use tobacco or nicotine in any form.**
- 8. Pregnant women, diabetics and people with heart problems should not use any tobacco or nicotine product.**
